## **Abstract**

In the first part of the paper, the coordinators of CCF 2012 present the evolution of the CCF conferences, which became an important international forum for the dissemination of recent information and scientific results in quality and dependability (reliability, maintainability, safety/security). In the second part of the paper, they present the objectives and the topics of CCF 2012. The authors mention that several debates of CCF 2012 will be dedicated to the evolutions in the European quality on the European scene during these last years, as well as to the national evolutions in this field. The International Conference in Quality and Dependability – CCF is now a well established brand of excellence among the international scientific meetings in the interdisciplinary field of quality and dependability.

**Keywords:** Quality, Dependability, Reliability, International Conference, CCF, Quality policy.
